About university:

Sri Padmavati Mahila Visvavidyalayam (Women's University) was founded in the temple town of Tirupati in 1983 by Sri N.T. Rama Rao, the then Chief Minister of Andhra Pradesh, with the fervent desire to train women students as better builders of the Nation and to inculcate skills of leadership in all aspects of life. Today the University has a student population of 4000 and an academic staff of 250 with 60 courses at the post-graduate and undergraduate level and a good component of research.

About Institute:

Institute of Pharmaceutical Technology (IPT) was established in the year 1995, offers B. Pharm., M. Pharm. in the specializations Pharmaceutical Chemistry, Pharmacology, Pharmaceutics, Pharmaceutical Analysis, Pharmacognosy and Ph.D. programmes. In the last 16 years, more than 400 research papers have been published and presented at various national and international conferences. The college has received several research grants from AICTE, DST, UGC, and SAP.

About The Conference

The process of drug discovery and development begins with the challenges in identification and validation of target that contributes to disease. The development of assay methods is another challenging area to find lead compounds that

actively modulate the target to have therapeutic effect. Further, development of a therapeutic drug candidate from a lead molecule and a suitable pharmaceutical formulation poses several challenges. Hence, scientific advancements in pharmaceutical sciences are needed to improve and accelerate drug discovery and development.

In the two days conference, scientific sessions have been planned to provide a platform to the faculty and students for interaction and updates on current challenges in the field of drug discovery and development.

Technical sessions:

Technical sessions include key note address, five lead lectures followed by poster presentations by teaching faculty, research scholars, P.G. and U.G. students.
